RE: Arizona Public Service Company Updated Analysis based on 2010 SATS
Decision No. 72031; Docket No. E-00000D-09-0020

In Decision No. 72031, dated December 10, 2010, the Commission ordered that:

APS, SWTC and TEP shall conduct additional analysis of potential 230 kV and 138 kV voltage deviations in Southeastern Arizona as noted in the 2009 SATS report and file an update based on the 2010 SATS by February 28, 2011.

Although Arizona Public Service Company ("APS") does not have any 230 kV or 138 kV transmission lines in Southeastern Arizona, APS is a member of the WestConnect Planning areas and the Southwest Area Transmission (SWAT) Sub-Regional Planning Group. APS also participates in various SWAT subcommittees, including the Southeast Arizona Transmission System (SATS) subcommittee.

Tucson Electric Power ("TEP") serves as the chair of the SATS subcommittee. In that capacity, TEP is responsible for filing the 2010 SATS Report on behalf of the SATS participants. As such, TEP included an updated analysis based on the 2010 SATS Report in its 2011-2020 Ten-Year Plan, which was filed in Docket No. E-00000D-11-0017 on February 28, 2011. This letter serves as notice to the Commission that APS has complied with the filing requirement in Decision 72031 via TEP's filing described above.

If you have any questions regarding this information, please contact Jennie Vega at (602) 250-2038.

Sincerely,

Susan Casady
